This was ported to MS-DOS and the IBM-PC in 1983.[7][8] Computer Associates acquired Information Unlimited Software in 1983[9][10][11] and ran it as an independent business unit.[12][13] Easy Business Systems added payroll processing in 1984 and supported multuser networking at this time.[14] In 1987, it implemented a multi-window interface to allow moving between different modules.[12] Easy Business Systems was renamed Accpac Plus in 1987 with the release of version 5.[15] Accpac became popular in Canada with support of Canadian public accounting firms that would sell and support the software.[13] The name Accpac is an acronym for 'A Complete and Comprehensive Program for Accounting Control'.[16] Accpac for Windows v3 desktop The first Windows version, CA-Accpac/2000, popularly known as ACCPAC for Windows, was developed in the early 1990s and released in October 1994.[17][18] The Windows version marked the move to client/server and was developed with all new code in COBOL with Computer Associates development tools (these components were redeveloped in 2001 in Accpac Advantage Series with a core business layer developed in C and a user interface layer developed in Visual Basic).[19][20] In October 1996 ACCPAC for Windows 2.0 was released.[21] In August 2001, the company presented ACCPAC Advantage Series 5.0, its first web-based version.[22] The web interface was rebuilt in Sage 300 2016 for cross browser support, running on IIS with ASP.Net.[23] a web API was added in the 2017.[24][25] Sage 300 initially ran on Btrieve Databases[26] and then supported a variety of database backends [27] Since Sage 300 2016 only the MS SQL database is supported.[26] Sage Software acquired Accpac from Computer Associates in 2004.[28] Sage renamed it Sage Accpac ERP in 2006,[29] then Sage ERP Accpac in 2009. pp. 3-2. ^ Smith, Stephen (September 1, 2012). p. 11. ^ Sage 300 2022 Installation and Administration Guide (PDF).
